

EDMONTON CATHOLIC SCHOOLS

The environment is everyone's responsibility. We can all breathe a little easier if people turn off their vehicles when they are sitting in them. One person can truly make a difference! Ask the driver of the vehicle you are in to turn off the engine if the vehicle is parked.

# Idle-Free ZONE

## WHAT IS IDLING?

Idling is what a car is doing when its motor is running while it is parked.

## WHAT ARE THE DANGERS OF IDLING?

Reports tell us that there are major health issues for children, such as asthma, and it also causes pollution, which some reports say is one the causes of climate change.

## WHAT CAN WE DO?

By turning off the car if you have to wait for any longer than 10 seconds, you will help reduce all of the bad affects idling causes to our earth.
