

*Our belief in a gracious Creator affirms the goodness and inter-relatedness of all creation. Scientific discoveries heighten our moral and ethical awareness of the earth's fragile state.*

*Both this belief and these discoveries lead to a care for creation in all its inclusiveness. This care is multifaceted and involves a consistent life ethic.*

*The Edmonton Catholic Separate School District No. 7 will cooperate with all those groups that share a similar concern for the care of creation. This care includes the spiritual, social, personal, ethical, intellectual, economic and scientific dimensions.*

*Specifically the district is committed to*

- 1. leadership in improving the quality of the environment,*
- 2. promotion of values, attitudes, understanding and skills which lead to environmentally responsible behaviour,*
- 3. cooperation with agencies that promote care for creation,*
- 4. advocacy of learning experiences within the curriculum, appropriate to student developmental levels, that reflect care for creation, and*
- 5. consideration of environmental issues and concerns in purchasing, building and maintenance programs.*
